

# Matthew Langham

## Technical Project Manager Scrum Master Product Owner Consultant

### Career summary

Matthew has always been, and continues to be, at the forefront of new technology innovations. He designed and worked on one of the first Internet banking solutions in Germany in the mid 1990's and he conceived and helped to implement one of the first mobile banking solutions in Germany in 1999. In the early 2000's he was a main driver of Open Source adoption within large commercial organizations and educated commercial entities on how to give back to the Open Source communities.

Today he brings his passion for software development and his experience in leading large and diverse development teams into projects across different business domains. Matthew's strength lies in his ability to fill different roles such as technology evangelist, technical project manager, Scrum Master or Product Owner to design and deliver complex software projects. He strives to bridge the gap between the business and the technology domains.

Matthew has also written several acclaimed books, many technical articles and has spoken at varied conferences across Europe and the US.
